

now going wearable.;!!

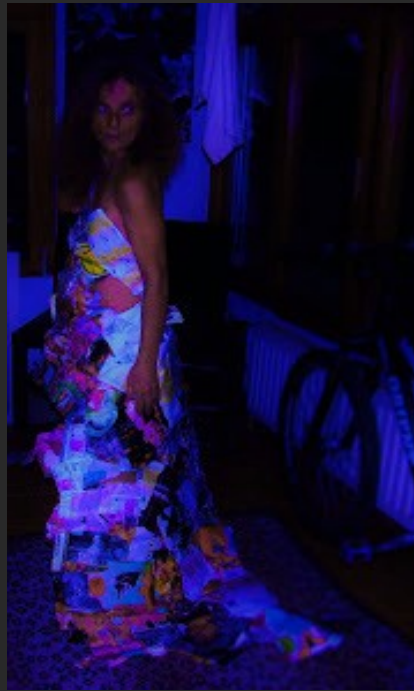

this work is based on creating the material for the 'fabric' used to make cloths. this material is a papercollage(with the possibility to transfer it into printed fabric),made of wish lists(items, places, excursions, dreams come true, desires waiting to be fulfilled), collected from magazines and newspapers., disposable printed ads and combined with the money flow involved in the process, presented as copies of money notes in various sizes. The frenzy is accompanied by extravagant fashion designs as appropriate. (see formal dress and hat).

. Further in this "material' one finds as well political issues and human rights themes (which are also met in fashion magazines) intertwined again with copies of money notes. (see lovely stole for chilly

). more photos...

details of the material involved
